Water Smart Plant List for the Sacramento Region

Very Low, Low, and Moderate Water-Use Plants

The Lawn Replacement Rebate Program requires a 50% plant coverage in all lawn conversions or 100% in smaller projects. Below you can use these lists as a guideline for getting started on your plant selection. This list is intended as a tool for participants in the Lawn Replacement Rebate. The Water Smart Plant List contains some of the most common very low, low, and moderate water-use plants appropriate for the Sacramento region. These are not exhausted lists of plants acceptable for the Lawn Removal Rebate.

Plant List courtesy of the City of Roseville.
